

# THE GIGATOWER™

## The latest PMP 450 Access Network Solution

### GIGABIT THROUGHPUT FOR GROWTH

From the largest enterprises to residential customers in urban, suburban and rural markets globally, the key requirement is higher throughput and symmetrical service. The new Canopy PMP GIGATOWER shatters the bandwidth barrier that can transform your network to a very high capacity triple play capable offering. By delivering ample bandwidth which can easily support HD Video and IPTV as well as voice utilizing the very low Canopy latency, the ability to drive new services is at your finger tips. The PMP 450 is incredibly scalable in 90mbps increments all the way to 1,080mbps on a single tower. The PMP450 also allows the delivery of symmetrical bandwidth (unlike ADSL which is limited to asymmetrical traffic only) which supports cloud computing, video conferencing, video surveillance and much more.

### MULTI-MEDIA SERVICES GROWTH

The new Canopy PMP 450 is designed for growth. Your growth. It lets you efficiently and cost-effectively offer popular multi-media services that maximize growth. High-speed data and cloud access. Video on Demand. Reliable fixed voice and VoIP. It helps you grow by providing consistent and reliable coverage across large service areas, allowing you to deliver in-demand services to urban, suburban, rural and remote locations. For revenue optimization, the system also supports tiered service models with a software defined Remote Module that can be upgraded to support throughput from 4 Mbps to 55 Mbps.

### FASTER, SIMPLER CONNECTIVITY

Canopy PMP 450 growth is fast and easy. No trenches to dig. No copper or fiber to put in the ground. No weeks or months of waiting. The Canopy 450 deploys in hours and works with your existing systems, so there are no expensive, labor-intensive, time-consuming forklift replacements. Time-to-market is greatly reduced, and network performance remains consistent as subscribers are added. You can reach customers months before they could be reached by wireline technology. You can serve more customers with fewer modules and install equipment on your existing towers. You'll have the scalability that enables your network to grow and keep pace with your business.

### CAMBIUM EXPERIENCE

Cambium Networks provides exceptional wireless broadband connectivity solutions. With 4 million modules deployed in thousands of networks around the world, Cambium solutions are proven to provide cost effective, reliable data, voice and video connectivity.
